Note 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Providence Washington Insurance Company, ("The Company" or "PWIC") are presented on the basis of accounting practices prescribed or permitted by the Rhode Island Department of Business Regulation ("RIDBR").

The RIDBR recognizes only statutory accounting practices prescribed or permitted by the state of Rhode Island for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under Rhode Island Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Rhode Island. The Rhode Island Department of Business Regulation ("RIDBR") has the right to permit specific practices that deviate from prescribed practices.

Reconciliations of the Company net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Rhode Island for the twelve months ending December 31, 2018 and 2017 are shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles and prescribed or permitted by RI DBR requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. The Company's principal estimates include unpaid loss and loss adjustment reserves, unpaid reinsurance recoverable and impairments to the fair value of investments. The Company utilizes historical information, actuarial analyses, financial modeling and other analytical techniques to prepare these estimates. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related reinsurance contracts or insurance policies. Premium adjustments and contingent commissions on retrospectively rated contracts are recognized in the periods in which the related losses are incurred. Unearned premium liabilities are established to cover the unexpired portion of premiums written. Such liabilities are computed by pro rata methods based on statistical data and reports received from ceding companies. Commissions and other acquisition costs related to premiums written are expensed at the time premiums are written.

Receivables ninety days or more past due are classified as nonadmitted assets, which are charged directly to surplus.

The liability for unpaid losses and loss adjustment expenses is based on direct reports and individual case estimates received from ceding companies and is net of amounts recoverable from retrocessionaires. In addition, a liability is included for unpaid loss and loss adjustment expenses incurred but not reported ("IBNR"). The methods for establishing such estimates and resulting liabilities are reviewed quarterly and any adjustments resulting therefrom are included in income currently. While management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The liabilities also include a provision for environmental and latent injury claims.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as commissions, premium taxes, and other items, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Guaranty fund and other assessments are accrued at the time events occur and when the amount of the expense can be reasonably estimated.

Net investment income earned consists primarily of interest and dividends less investment related expense. Interest is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Net realized capital gains (losses) are recognized on a specific identification basis for bonds and a first-in, first-out basis for common stocks. Unrealized capital gains (losses) are reflected in unassigned surplus.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments include money market funds and highly liquid debt instruments purchased with a remaining maturity of twelve months or less, excluding those investments classified as cash or cash equivalents. Short-term investments are stated at cost, which approximates fair value.
- (2) Bonds with NAIC designations 1 or 2 are stated at amortized value using the interest method. Non-investment grade non-loaned back bonds with NAIC designations of 3 through 6 are stated at the lower of amortized value or fair value. The discount is accreted and premium is amortized on bonds using the scientific method.
- (3) Perpetual preferred stocks are carried at fair value for high quality investments. Perpetual preferred stocks of medium or low investment quality as determined by the Securities Valuation Office are carried at the lower of cost or market.
- (4) Common stocks are carried at market value, except that investments in stocks of subsidiaries, controlled and affiliated companies are carried in accordance with SSAP No 97, *Investment in Subsidiaries, controlled Entities and Affiliates.*
- (5) Loan-back and structured securities are stated at either amortized cost or the lower of amortized cost or fair market value. The constant yield scientific method including anticipated prepayment assumptions is used to value all securities. Changes in current prepayment assumptions are accounted for using the prospective method.
- (6) The Company has no investments in subsidiaries, controlled, and affiliated companies.
- (7) The Company has no investments in joint ventures, partnerships or limited liability companies.
- (8) The Company has no derivative instruments.
- (9) The Company does not anticipate investment income when evaluating the need for premium deficiency reserves.
- (10) Loss and loss adjustment expense reserves are estimates that provide for the ultimate expected cost of settling unpaid losses and claims reported at each balance sheet date. Losses and claims incurred but not reported, as well as expenses required to settle losses and claims, are established on the basis of various criteria, including historical cost experience and anticipated costs of servicing reinsured and other risks. Such liabilities are necessarily based on assumptions and estimates and while management believes the amounts are adequate, the ultimate liabilities may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined. The Company believes that overall reserving practices have been consistently applied, and that its aggregate net reserves have resulted in reasonable approximations of the ultimate net costs of claims incurred. These estimates are continually reviewed and adjusted as necessary; such adjustments are reflected in current operations. The Company's liability for unpaid loss and loss adjustment expense is presented net of amounts recoverable from reinsurers.
- (11) The Company is a member of an affiliated group of companies which file a consolidated federal income tax return. Under the terms of an intercompany tax allocation agreement, the Company is allocated federal income taxes by applying the current regular federal tax rate to statutory results of operations modified by book versus tax adjustments. Alternative minimum taxes are allocated ratably to companies with taxable income.
- (12) Realized capital gains and losses on the sale of investments are determined on a specific identification method and are included in the determination of net income. Unrealized capital gains and losses resulting from changes in the valuation of investments at fair value are credited or charged directly to surplus.
- (13) The Company regularly evaluates investments based on current economic conditions, credit risk experience and other circumstances of the underlying securities. A decline in a security's net market value that is not a temporary fluctuation is recognized as a realized loss, and the cost basis of that security is reduced.
- (14) Premiums earned, loss and loss adjustment expenses incurred, unearned premiums, and the liability for losses and loss adjustment expenses are reflected net of reinsurance assumed from and ceded to other companies.
- (15) The assets and liabilities of operations with foreign functional currencies are translated net into U.S. dollars at current exchange rates and the resulting adjustment recorded is reflected as a liability in the statutory financial statements. The resulting net translation adjustments for each period are included in surplus.

- D. Loan-Backed Securities
 - (1) Our asset manager uses a proprietary model for loss assumptions and widely accepted models for prepayment assumptions in valuing mortgage-backed and asset-backed securities with inputs from major third party data providers. It combines the effects of interest rates, volatility, and prepayment speeds based on Monte Carlo simulation with credit loss analysis and resulting effective analytics (spreads, duration, convexity) and cash-flows are reported to clients on a monthly basis. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.
 - (2) There were no other-than-temporary-impairments for loan backed securities recorded during the year.
 - (3) There were no other-than-temporary-impairments for loan backed securities held at the end of the year.
 - (4) All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a.	The aggregate amount of unrealized losses:			
		1	Less than 12 Month	\$ 395,640
		2	12 Months or Longer	\$ 507,545
b.	The aggregate related fair value of securities with unrealized losses:			
		1	Less than 12 Month	\$ 13,113,666
		2	12 Months or Longer	\$ 13,611,442

- (5) There are a number of factors that are considered in determining if there is not an other-thantemporary-impairment on an investment, including but not limited to, debt burden, credit ratings sector, liquidity, financial flexibility, company management, expected earnings and cash flow stream, and economic prospects associated with the investment.
- E. Dollar Repurchase Agreements and/or Securities Lending Transactions

For repurchase agreements, Company policies require a minimum of 102% of the fair value of securities purchased under repurchase agreements to be maintained as collateral. There were no open repurchase agreements as of December 31, 2018.

D. Reconciliation of Federal Income Tax Rate to Actual Effective Rate

The provision for federal income taxes incurred is different from that which would be obtained from applying the statutory federal income tax rate to pre-tax income. The significant items causing this difference are as follows

	Amount	Tax Effect	Effective Tax Rate
Income from operations before income taxes	1,396,714	\$ 293,310	
Net realized capital gains before income taxes	(1,173,471)	(246,429)

Note 12 - Retirement Plans, Deferred Compensation, Postemployment Benefits and Compensated Absences and Other Postretirement Benefit Plans

A. Defined Benefit Plan and Postretirement Benefits

The Company, on behalf of employees of itself and employees of all subsidiaries, sponsors a defined benefit pension plan which covers substantially all employees hired before April 1, 2003, and provides pension and death benefits. The funding policy is to accrue and pay an amount sufficient to fund the minimum amount that can be deducted for federal income tax purposes which considers the annual current service cost on an annual basis, and an amount needed to amortize the plan's unfunded accrued liability over a seven year period. In addition, the Company sponsors and has accrued for a noncontributory executive retirement benefit for a former employee.

Effective April 1, 2004, the Company announced a freezing of its defined benefit pension plan.

A summary of total assets, total obligations and assumptions of the Pension Benefit Plan follows, at December 31, 2018 and 2017, respectively. The Company records the 100% Plan costs disclosed below.

The Company's Postretirement Benefit Plan was terminated on December 31, 2003. There are no assets or obligations to report.

e. Total	100%	100%	-

Pension Plan assets are invested in a broad based asset allocation fund, comprised primarily of high grade domestic fixed income securities and domestic equities. The Company utilizes a target allocation strategy, designed to create an asset mix that appreciates in value, as well as manages expenses and contributions.

Asset allocations and investment performance is formally reviewed quarterly by the plan's investment Oversight Committee. Forecasting of asset and liability growth is performed at least annually. More thorough analysis of assets and liabilities are also performed periodically.

- B. The Company has no preferred stock outstanding.
- C. There are no dividend restrictions
- D. Dividends to common stockholders are paid as declared by the Board of Directors of the Company. The Company's dividends are subject to the regulation and prior approval of the State of Rhode Island. The current regulation allows an annual dividend without prior approval that is limited to the lesser of net income, exclusive of realized gains, for the latest twelve month period ending December 31, next preceding, or 10% of policyholders surplus as of the 31st day of December next preceding. Stockholder dividends declared for the years ended December 31, 2018 and 2017 were \$30,762,255 and \$11,922,852 respectively. In 2018, a dividend of \$12,824,792 was paid on September 27, 2018 and a second dividend of \$17,937,433 was declared in December 2018 (see note 22 for details). In 2017, a dividend of \$11,922,852 was paid on October 17,2017.

Note 14 - Liabilities, Contingencies and Assessments

A. Contingent Commitments

As described in Note 10(E), the Company has made no guarantees on behalf of affiliates.

As described in Note 27, the Company has purchased annuities from life insurers that are directly payable to claimants but for which the Company may be contingently liable. The annuities have been used to reduced unpaid losses by approximately \$7,199,877 and \$7,762,812 as of December 31, 2018 and 2017, respectively.

B. Assessments

The Company is subject to guaranty fund and other assessments by the states in which it writes business. Guaranty fund assessments should be accrued at the time of insolvencies. Other assessments should be

accrued either at the time of assessments or in the case of premium based assessments, at the time the premiums were written, or, in the case of loss based assessments, at the time the losses are incurred.

The Company has not accrued a liability for guaranty fund and other assessments. This represents management's best estimate based on information received from the states in which the Company writes business and may change due to many factors including the Company's share of the ultimate cost of current insolvencies.

C. Gain Contingencies

Note 20 - Fair Value Measurement

- A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value
 - 1. Fair Value Measurements by Levels 1, 2 and 3

The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the table below. The three level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows:

Level 1- Quoted Prices in Active Markets for Identical Assets and Liabilities: This category is for items measured at fair value on a recurring basis which includes US Treasuries which are backed by the full faith and credit of the US Government. The estimated fair value of these securities within this category is based on quoted prices in active markets and is thus classified as Level 1.

Level 2- Significant Other Observable Inputs: This category is for items measured at fair value on a recurring basis which includes bonds that are not exchange traded. The estimated fair values of some of these items were determined by independent pricing services using observable inputs. Others were based on quotes from markets which were not considered actively traded.

Level 3- Significant Unobservable Inputs: The estimated fair values of some of these items were determined by broker quotes or statements using observable and unobservable inputs.

2. Rollforward of Level 3 items

The Company has assets that are measured at fair value in the Level 3 category. Below is the year to date rollforward.

Description	Beginning Balance at 01/01/2017	Transfers into Level	Transfers out of Level 3	Total gains and (losses) included in Net	Total gains and (losses) included in Surplus	Purchases	Issuances	Sales	Settle ments	Ending Balance at 12/31/2018

Total Assets	12,156,880	_	_	(111,732)	883,390	_		2,558,570		10,369,968

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, there were transfers to Level 3 at year end 2017 as secondary pricing was not confirmed for these securities.

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Bonds carried at fair value categorized as Level 3 were valued using broker quotes or statements. These valuations are determined to be Level 3 valuations as secondary pricing was not confirmed for these securities.

Bonds carried at fair value categorized as Level 2 were valued using a market approach. These valuations are determined to be Level 2 valuations as quoted market prices for similar instruments in an active market were utilized.

Note 22 - Events Subsequent

Subsequent events have been considered through February 25, 2019, the date of issuance of these statutory financial statements. On February 15, 2019, the Company transferred assets in the amount of \$17,937,433 to Yosemite as payment for dividend declared to Enstar Holdings (US)Inc, parent. This was the intent of the Board of Directors as expressed in Consents and Regulatory approval. The dividend was for excess capital as a result of the NRLA agreement with YIC and the capital infusion into Yosemite as respects to the liabilities it is reinsuring from Providence Washington.

Note 23 - Reinsurance

A. Unsecured Reinsurance Recoverables

The Company has an unsecured aggregate recoverable for losses, paid and unpaid including IBNR, loss adjustment expenses and unearned premium with individual reinsurers, authorized and unauthorized, that exceeds 3% of the policyholders' surplus.

A. Reserves Released due to Purchase of Annuities

The Company has purchased annuities from life insurers under which the claimants are payees (see Note 14A). These annuities have been used to reduce unpaid losses by \$7,762,812 as of December 31, 2018. The Company has a contingent liability of \$7,762,812 should the issuers of these annuities fail to perform under the terms of the annuities.

B. Annuity Insurers with Balances due Greater than 1% of Policyholders' Surplus.

Note 33 - Asbestos/Environmental Reserves

The Company has exposure to environmental and asbestos claims. The Company's environmental and asbestos exposure arises from the Company's past sale of General Liability, Commercial Multi-Peril, and Commercial Automobile insurance as well as from past participation in Assumed Reinsurance Pools. Regarding the direct exposure, the Company estimates the full impact of the environmental and asbestos exposure by establishing full case-basis reserves on all known claims and by computing incurred but not reported losses based on historical experience.

As respects the environmental and asbestos liability arising from assumed reinsurance, the Company was a participant in a pool of approximately fifty assumed reinsurance treaties which were discontinued in 1987. One of these treaties involves a small share of the ECRA pool. The participation in each treaty, although small (ranging from one-half of one percent to four percent), varied substantially by year with not all treaties being inforce for all years.

A. Does the company have on the books, or has it ever written an insured for which you have identified a potential for the existence of a liability due to asbestos losses? Yes

The Company tries to estimate the full impact of the asbestos exposure by establishing full case basis reserves on all known losses and computing incurred but not reported losses based on previous experience.
