C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct and ceded business.

Expenses incurred in connection with acquiring new insurance business, including commissions, are charged to operations, as incurred. Expenses incurred are reduced for ceding allowances received or receivable to the extent such amounts do not exceed the costs incurred to acquire the related business. Excess ceding allowances are recorded as unearned income to be recognized as the related premiums are earned.

In addition, the Company uses the following accounting policies:

1. Short-term investments are stated at amortized cost, which approximates fair value.
2. Investment grade bonds not backed by other loans are stated at amortized cost using the scientific interest method. The Company has no non-investment grade bonds.
3. The Company does not have common stock.
4. The Company does not have preferred stock.
5. The Company does not have mortgage loans.
6. The Company does not have loan-backed securities.
7. The Company does not have any investment in subsidiary.
8. The Company does not have any interests in joint ventures, partnerships or limited liability companies.
9. The Company does not have any derivative instruments.
10. The Company does not anticipate investment income as a factor in any premium deficiency calculation.
11. Loss and loss adjustment expenses are charged to expense as incurred. The reserve for unpaid loss and loss adjustment expenses is based upon claim adjusters' evaluations and other estimates, including those for incurred but not reported losses (IBNR) and for reinsurance. Overall reserve levels are impacted primarily by the types and amounts of insurance coverage written, trends developing from newly reported claims and claims that have been paid and closed. The determination of estimates for losses and loss expenses and the establishment of the related reserves are periodically reviewed and updated during the year. Adjustments are made to reserves in the period that can be reasonably estimated to reflect evolving changes in loss development patterns and various other factors, such as social and economic trends and judicial interpretation of legal liability. While management believes that the amount carried as reserves for unpaid loss and loss adjustment expense is adequate, the ultimate liability may be in excess of or less than the amount provided.
12. The Company has a written capitalization policy for prepaid expenses and purchases of items such as electronic data processing equipment, software, furniture, other equipment and leasehold improvements. The predefined capitalization thresholds under this policy have not changed from those of the prior year.
13. The Company does not have any pharmaceutical rebate receivables.

NOTE 20 Fair Value Measurements**A. Inputs Used for Assets and Liabilities Measured at Fair Value**

SSAP 100 establishes a fair value hierarchy which prioritizes and ranks the level of market price observability used in measuring investments at fair value. Market price observability is impacted by a number of factors, including the type of investment, the characteristics specific to the investment, and the state of the marketplace (including the existence and transparency of transactions between market participants). Investments with readily-available actively quoted prices or for which fair value can be measured from actively-quoted prices in an orderly market will generally have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value.

Investments disclosed at fair value are classified and disclosed in one of the following categories based on inputs:

Level 1 - Fair value measurements that are quoted prices (unadjusted) in active markets that the Company has the ability to access for identical assets or liabilities. Market price data generally is obtained from exchange or dealer markets. The Company does not adjust the quoted price for such instruments.

Level 2 - Fair value measurements based on inputs other than quoted prices included in Level 1 that are observable for the asset, either directly or indirectly. Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, and inputs other than quoted prices that are observable for the asset, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3 - Fair value measurements based on valuation techniques that use significant inputs that are unobservable. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the determination of which category within the fair value hierarchy is appropriate for any given investment is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

For the Company's investment portfolio, the Company obtains quoted prices in active markets, when available, for identical or similar assets at the balance sheet date. Market price data is generally obtained from dealer markets.

The Company carries no assets or liabilities on its balance sheet measured at fair value.

B. Other Fair Value Disclosures

Not applicable

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

Such characteristics include an interest rate above prime to borrowers who do not qualify for prime rate loans, borrowers with low credit ratings (FICO scores), unconventionally high initial loan-to-value ratios, and borrowers with less than conventional documentation of their income and/or net assets.

NOTE 22 Events Subsequent

Subsequent events have been considered through August 14, 2020 for the statutory financial statements issued as of June 30, 2020 and determined there were none that required disclosure.

In the first quarter of 2020, the World Health Organization declared a global health pandemic due to the spread of the "COVID-19" virus. The Company is not aware of any material impacts of the COVID-19 epidemic on its financial position. The lines of business the Company writes combined with the reinsurance protection purchased should limit the impact on the underwriting results of the Company. The potential exposure to the Company's investment portfolio should also be minimal as the portfolio is conservatively positioned and invested only in investment grade fixed income securities.

The Company will continue monitoring the COVID-19 epidemic and assess its impact on the Company's financial position and liquidity.
