## 1. Nature of Operations and Summary of Significant Accounting Policies

## Nature of Operations

The Metropolitan Group Property and Casualty Insurance Company (“the Company”) is incorporated under the laws of the State of Rhode Island. The Company is a wholly owned subsidiary of Metropolitan Property and Casualty Insurance Company (“MPC”), domiciled in Rhode Island, which is a wholly owned subsidiary of MetLife, Inc. (“MetLife”), incorporated in the State of Delaware, a public company whose shares are traded on the New York Stock Exchange.

The Company is engaged, principally in the United States, in the property-liability insurance business. The Company’s primary ongoing business is the sale of private passenger automobile, homeowners and personal umbrella insurance.

The Company is authorized to sell property-liability insurance in 41 states and the District of Columbia. The top geographic locations for statutory direct earned premiums were Connecticut, Georgia, Illinois, Michigan, New Jersey, and New York for the year ended December 31, 2015. No other jurisdiction accounted for more than 5% of statutory direct earned premiums.

The Company has exposure to catastrophes, which are an inherent risk of the property-liability insurance business, which have contributed, and will continue to contribute, to material year-to-year fluctuations in the Company’s results of operations and financial position. The Company defines a catastrophe as an event that produces a number of claims in excess of a preset per-event threshold of average claims in a specific area. The Company also has exposure to environmental, asbestos, and other mass tort claims.

## Summary of Significant Accounting Policies

## A. Accounting Practices

The Company’s statement is presented on the basis of accounting practices prescribed or permitted by the Rhode Island Department of Business Regulation, Insurance Division (“RI DBR, Insurance Division”). While the RI DBR, Insurance Division has the right to permit specific practices that may deviate from prescribed practices, the Company did not follow any permitted practices other than those prescribed by the RI DBR, Insurance Division.

The RI DBR, Insurance Division has adopted the National Association of Insurance Commissioners’ statutory accounting practices (“NAIC SAP”) as the basis of its statutory accounting practices.

Accounting practices and procedures of the NAIC are a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America (“GAAP”). The more significant differences are as follows:

- (1) Investment in bonds are generally carried at amortized cost, while under GAAP, they are carried at either amortized cost or fair value based on their classification according to the Company’s ability and intent to hold or trade the securities;
- (2) Investments in common stocks are valued as prescribed by the Securities Valuation Office (“SVO”) of the NAIC, while under GAAP, common stocks are reported at market value;
- (3) Acquisition costs, such as commissions and other costs related to acquiring new business, are expensed as incurred, while under GAAP, they are deferred and amortized to income as premiums are earned or in relation to estimated gross profits;
- (4) Prior to January 1, 2001, a Federal income tax provision was made only on a current basis for Statutory Accounting, while under GAAP, a provision was also made for deferred taxes on temporary differences between the financial reporting and tax bases of assets and liabilities. Subsequent to January 1, 2001, NAIC SAP requires an amount to be recorded for deferred taxes however, there are limitations as to the amount of deferred tax assets that may be reported as “admitted assets”;
- (5) Assets are reported under NAIC SAP as “admitted-asset” value and “non-admitted” assets are excluded through a charge against surplus, while under GAAP, “non-admitted assets” are reinstated to the balance sheet, net of any valuation allowance;
- (6) The change in provision for reinsurance is charged or credited directly through surplus under NAIC SAP, while this provision is not recognized for GAAP purposes;
- (7) The balance sheet under NAIC SAP is reported net of reinsurance, while under GAAP, the balance sheet reports reinsurance recoverables, including amounts related to losses incurred but not reported, and prepaid reinsurance premium as assets;
- (8) Comprehensive income and its components are not presented in the statutory financial statements;

**NOTES TO FINANCIAL STATEMENTS**

- (9) Subsidiaries are included as common stock carried under the equity method, with the equity in net income of subsidiaries credited directly to the Company's surplus for NAIC SAP, while GAAP requires either consolidation or the equity in earnings of subsidiaries or net income of subsidiaries to be credited to the income statement; and
- (10) Goodwill under GAAP is calculated as the difference between the cost of acquiring the entity and the fair value of the assets received and liabilities assumed. Under NAIC SAP, goodwill is calculated as the difference between the cost of acquiring the entity and the reporting entity's share of the historical book value of the acquired entity. However, under NAIC SAP the amount of goodwill recorded as an "admitted asset" is subject to limitations. In June 2001, SFAS No. 142, Goodwill and Other Intangible Assets significantly changed the method of accounting for intangible assets. Previous authoritative guidance presumed that goodwill and all other intangible assets were wasting assets, and thus the amounts assigned them should be amortized in determining net income. SFAS No. 142 does not presume that those assets are wasting assets. Instead, goodwill and intangible assets that have indefinite useful lives will not be amortized but rather will be tested at least annually for impairment by comparing the fair values of those assets with their recorded amounts.

**B. Use of Estimates**

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

**C. Accounting Policy**

Premiums are generally recognized as revenue on a pro rata basis over the policy term. The portion of the premiums written applicable to the unexpired terms of the policies is recorded as unearned premiums.

- (1) Short-term investments are stated in the same manner as comparable longer-term investments described below.
- (2) Bonds not backed by other loans are generally stated at amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of amortized cost or fair value. Bonds not backed by other loans are amortized using the scientific method.
- (3) Common stocks of non-affiliates are stated at fair value. For investments in subsidiary, controlled or affiliated ("SCA") companies, see Note 1C(7).
- (4) Redeemable preferred stocks are generally stated at cost or amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of cost, amortized cost or fair value. Perpetual preferred stocks are generally stated at fair value unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of cost or fair value.
- (5) The Company has no mortgage loans.
- (6) Mortgage-backed bonds included in bonds are generally stated at amortized cost using the scientific method unless they have a NAIC rating designation of 3, 4, 5 or 6 which are stated at the lower of amortized cost or fair value. Amortization of the discount or premium from the purchase of these securities considers the estimated timing and amount of prepayments of the underlying mortgage loans. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For credit-sensitive mortgage-backed and asset-backed bonds and certain prepayment-sensitive bonds (e.g., interest-only securities), the effective yield is recalculated on a prospective basis. For all other mortgage-backed and asset-backed bonds, the effective yield is recalculated on a retrospective basis.

For certain residential mortgage-backed securities ("RMBS"), both an initial and final NAIC designation is determined on a security-by-security basis based on a range of values published by the NAIC. The initial designation is used to determine the carrying value of the RMBS. RMBS with initial designations of 1 to 2 are stated at amortized cost while RMBS with initial designations of 3, 4, 5 or 6 are stated at the lower of amortized cost or fair value. The final designation calculation compares this carrying value with a range of values, resulting in a final NAIC designation reported herein, which is used for all other accounting and reporting purposes.

For loan-backed securities, including asset-backed securities ("ABS"), which are not modeled, the NAIC relies on the second lowest NAIC Credit Rating Provider ("CRP") rating to determine the initial NAIC designation. The second lowest CRP rating is used to determine the carrying value of the security, which is based on the NAIC's estimate of expected losses, using an NAIC published formula. The carrying value of the security determines its final NAIC designation, which is used for reporting in the Annual Statement and in RBC calculations. This revised methodology does not apply to NAIC 1 and NAIC 6 securities, which are rated at the second lowest CRP designation.

- (7) The Company has no investments in subsidiary, controlled or affiliated ("SCA") companies.
- (8) The Company has no minor ownership interests in joint ventures, partnerships and limited liability companies.
- (9) For derivative accounting policy, see Note 8.
- (10) For premium deficiency reserve policy, see Note 30.
- (11) The liability for unpaid reported losses is based on a case by case estimate (case reserves) for most lines of business, for the other lines of business, unpaid losses are based on average "statistical" reserves. There is an additional overall estimate (supplemental reserves for several specific lines of business) based on the Company's past experience, this is also known as an additional reserve on known claims. A provision also is made for losses incurred but not reported on the basis of estimates and past experience modified for current trends and estimates of expenses for investigating and settling claims, reduced for anticipated salvage and subrogation. The liability for unpaid losses on business assumed is based in part on reports received from ceding companies.

Management believes that the liability for unpaid losses and loss adjustment expenses is adequate to cover ultimate unpaid losses and loss adjustment expenses incurred. However, such liability is necessarily based on estimates, and the ultimate liability may vary significantly from such estimates. In accordance with industry practice, the Company regularly reviews its estimated liability, and any adjustments are reflected in the period in which they become known. In accordance with guidelines established by the NAIC, the liability for unpaid losses at December 31, 2015 is reported net of estimated salvage and subrogation recoverable.

**NOTES TO FINANCIAL STATEMENTS**

The Company currently has asbestos and environmental impairment liability (“EIL”) loss reserves relating to the business written prior to 1990. The reserves related to these exposures are handled by a third party and the Company does not expect any adverse results from the asbestos and EIL due to a corresponding excess of loss contract.

(12) The Company has not modified its capitalization policy from the prior year end.

(13) The Company does not have pharmaceutical rebate receivables.

(2) The consolidating companies join with MetLife, Inc. (“MetLife”) and its includable subsidiaries in filing a consolidated U.S. life and non-life federal income tax return in accordance with the provisions of the Internal Revenue Code of 1986, as amended (the “Code”). Current taxes (and the benefits of tax attributes such as losses) are allocated to MetLife and its subsidiaries under the consolidated tax return regulations and a tax sharing agreement. Under the consolidated tax return regulations, MetLife has elected the “percentage method” (and 100 percent under such method) of reimbursing companies for tax attributes, e.g., net operating losses. As a result, 100 percent of tax attributes are reimbursed by MetLife to the extent that consolidated federal income tax of the consolidated federal tax return group is reduced in a year by tax attributes. On an annual basis, each of the profitable subsidiaries pays to MetLife the federal income tax which it would have paid based upon that year’s taxable income. If MetLife or the subsidiary has current or prior deductions and credits (including but not limited to losses) which reduce the consolidated tax liability of the consolidated federal tax return group, the deductions and credits are characterized as realized (or realizable) by MetLife and its subsidiaries when those tax attributes are realized (or realizable) by the consolidated federal tax return group, even if MetLife or the subsidiary would not have realized the attributes on a stand-alone basis under a “wait and see” method.

G. As of December 31, 2015, the Company had no liability for unrecognized tax benefits.

Various litigation claims, and assessments against the Company, in addition to those otherwise provided for in the Company's financial statements, have arisen in the course of the Company's business, including but not limited to, in connection with its activities as an insurer, employer and taxpayer. Further, state insurance regulatory authorities and other federal and state authorities regularly make inquiries and conduct investigations concerning the Company's compliance with applicable insurance and other laws and regulations.

It is not feasible to predict or determine the ultimate outcome of all pending investigations and legal proceedings or provide reasonable ranges of potential losses. In some matters, very large and/or indeterminate amounts, including punitive and treble damages, are sought. Although in light of these considerations it is possible that an adverse outcome in certain cases could have a material adverse effect upon the Company's financial position, based on information currently known by the Company's management, in its opinion, the outcomes of such pending investigations and legal proceedings are not likely to have such an effect. However, given the large and/or indeterminate amounts sought in certain of these matters and the inherent unpredictability of litigation, it is possible that an adverse outcome in certain matters could, from time to time, have a material adverse effect on the Company's financial statements.

**Assets and Liabilities**

The methods and significant assumptions used to estimate the fair value of all financial instruments are presented below.

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

When developing estimated fair values, the Company considers two broad valuation techniques: (i) the market approach and (ii) the income approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices for identical assets or liabilities. The Company defines active markets based on average trading volume for common stock. The size of the bid/ask spread is used as an indicator of market activity for bonds. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

In general, investments classified within Level 3 use many of the same valuation techniques and inputs as described in the Level 2 discussions below. However, if key inputs are unobservable, or if the investments are less liquid and there is very limited trading activity, the investments are generally classified as Level 3. The use of independent non-binding broker

## NOTES TO FINANCIAL STATEMENTS

quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop the valuation estimates generally causing these investments to be classified in Level 3.

### **Bonds, Cash and Short-term Investments**

When available, the estimated fair value for bonds, including loan-backed securities and short-term investments, are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1, are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified in Level 2.

When observable inputs are not available, the market standard valuation methodologies rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference to market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified in Level 3.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings.

### **Investment Income Due and Accrued**

Due to the short-term nature of investment income due and accrued, the Company believes there is minimal risk of material changes in interest rates or credit of the issuer such that estimated fair value approximates carrying value.

D. At December 31, 2015, the Company had no investments where it was not practicable to estimate fair value.

## 22. Events Subsequent

Subsequent to the December 31, 2015 close, the Company determined that an adjustment of \$5,490,594 was required between current and deferred taxes as a result of a reduction in the Clearwater Funds Held balance for loss payments made resulting in no net impact on surplus. In addition, the related deferred tax asset and non-admit asset would be adjusted and reduced resulting in an increase to surplus of \$5,490,594. The Company has evaluated events subsequent to December 31, 2015, through February 16, 2016, which is the date these financial statements were available to be issued, and have determined there are no other material subsequent events requiring adjustment to or disclosure in the financial statements.

- (2) The transaction between the Company and Clearwater Insurance Company continues to be treated as a loss portfolio transaction. ## F. Retroactive Reinsurance

Metropolitan Group Property and Casualty Ins. Co (formerly Met Re) wrote reinsurance lines of business prior to 1991. The Company engaged in a complex transaction with Clearwater Insurance Company (formerly Odyssey Reinsurance Corporation; prior to that, Skandia America Reinsurance Corporation) and former Odyssey Re affiliate Hudson Reinsurance Company Limited, whereby all 1989 and prior reinsurance business reserves were transferred to Hudson (subsequently transferred to Clearwater via a novation of the transaction agreement). The Company is protected from negative loss development on the reinsurance reserves by virtue of an additional excess of loss reinsurance contract with Clearwater. Through a separate agreement, Clearwater agreed to administer the business during the runoff period.
