NOTES TO THE FINANCIAL STATEMENTS**1. Summary of Significant Accounting Policies and Going Concern****A. Accounting Practices**

The accompanying financial statements of Metropolitan General Insurance Company (the “Company” or “MGEN”) have been prepared on the basis of accounting standards prescribed or permitted (“RI SAP”) by the State of Rhode Island (“RI”) Department of Business Regulation, Insurance Division (the “Department” or “RIDBR”).

The Department recognizes only the statutory accounting practices prescribed or permitted by Rhode Island in determining and reporting the financial condition and results of operations of an insurance company, in determining its solvency under the Rhode Island Insurance Law. In 2001, the National Association of Insurance Commissioners’ (“NAIC”) *Accounting Practices and Procedures Manual* (“NAIC SAP”) was adopted as the basis of RI SAP.

The Department has not adopted any prescribed accounting practices that differ from those found in NAIC SAP. A reconciliation of the Company’s net income and capital and surplus between RI SAP and NAIC SAP is as follows:

	<u>SSAP Number ⁽¹⁾</u>	<u>Financial Statement Page</u>	<u>Financial Statement Line Number</u>	<u>For the Year Ended December 31, 2021</u>	<u>For the Year Ended December 31, 2020</u>

⁽¹⁾ Statement of Statutory Accounting Principles (“SSAP”)

The Company’s risk-based capital (“RBC”) would not have triggered a regulatory event without the use of the state prescribed practices.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the statutory financial statements requires that management make estimates and assumptions that affect the reported amounts of assets and liabilities at the dates of the financial statements. In applying these estimates, management makes subjective and complex judgments that frequently require assumptions about matters that are inherently uncertain, including the novel coronavirus COVID-19 Pandemic. It also requires disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results may differ from those estimates.

All references to realized and unrealized net capital gains (losses), including other than temporary impairments (“OTTI”) and impairments, are pre-tax unless otherwise noted.

C. Accounting Policy

Premiums are generally recognized as revenue on a pro rata basis over the policy term. The portion of the premiums written applicable to the unexpired terms of the policies is recorded as unearned premiums.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated in the same manner as comparable longer-term investments described below.
- (2) Bonds not backed by other loans are generally stated at amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6, which are stated at the lower of amortized cost or fair value. Bonds not backed by other loans are amortized using the scientific method. The Company did not sell and reacquire any NAIC Securities Valuation Office Identified Funds.
- (3) Common stocks of nonaffiliates are stated at fair value.
- (4) Redeemable preferred stocks are generally stated at amortized cost unless they have a NAIC rating designation of 3, 4, 5 or 6, in which case such stocks are stated at the lower of amortized cost or fair value. Perpetual preferred stocks are generally stated at fair value. Mandatory convertible preferred stocks are stated at fair value, not to exceed any currently effective call price, prior to conversion.
- (5) Mortgage loans on real estate are principally stated at amortized cost, net of valuation allowances.
- (6) Mortgage-backed bonds, included in bonds, are generally stated at amortized cost using the scientific method unless they have a NAIC rating designation of 3, 4, 5, or 6, which are stated at the lower of amortized cost or fair

NOTES TO THE FINANCIAL STATEMENTS

value. Amortization of the discount or premium from the purchase of these securities considers the estimated timing and amount of prepayments of the underlying mortgage loans. Actual prepayment experience is periodically reviewed and effective yields are recalculated when differences arise between the prepayments originally anticipated and the actual prepayments received and currently anticipated. For credit-sensitive mortgage-backed and asset-backed bonds and certain prepayment-sensitive bonds (e.g., interest-only securities), the effective yield is recalculated on a prospective basis. For all other mortgage-backed and asset-backed bonds, the effective yield is recalculated on a retrospective basis.

For certain residential mortgage-backed securities (“RMBS”) and commercial mortgage-backed securities (“CMBS”), both an initial and final NAIC designation is determined on a security-by-security basis based on a range of values published by the NAIC. The initial designation is used to determine the carrying value of the RMBS or CMBS. RMBS and CMBS with initial designations of 1 or 2 are stated at amortized cost, while RMBS and CMBS with initial designations of 3, 4, 5 or 6 are stated at the lower of amortized cost or fair value. The final designation calculation compares this carrying value with a range of values, resulting in a final NAIC designation reported herein, which is used for all other accounting and reporting purposes.

- (7) The Company accounts for investments in subsidiary, controlled and affiliated (“SCA”) companies using the statutory equity of the investee if the entity is an insurance company. All noninsurance entities are valued at the U.S. Generally Accepted Accounting Principles (“GAAP”) equity of the investee.
- (8) Investments in joint ventures, partnerships and limited liability companies (“LLC”) are carried at the underlying audited GAAP equity (or audited International Financial Reporting Standards (“IFRS”) equity for certain partnership interests) of the respective entity’s financial statements. Undistributed earnings of these entities are recognized in unrealized gains and losses. Such investments are nonadmitted if they do not have financial statement audits.
- (9) The Company did not utilize derivative instruments.
- (10) The Company considers anticipated investment income as a factor in the premium deficiency calculation.
- (11) The liability for unpaid reported losses is based on a case by case estimate (case reserves) for all lines and coverages within line of business, except for the non-injury automobile claims. For the non-injury automobile coverages, unpaid losses are based on average “statistical” reserves. There is an additional overall estimate (supplemental reserves for several specific coverages within lines of business) based on the Company’s past experience; this is also known as an additional reserve on known claims. A provision is also made for losses incurred but not reported on the basis of estimates and past experience modified for current trends and estimates of expenses for investigating and settling claims, reduced for anticipated salvage and subrogation. The liability for unpaid losses on business assumed is based in part on reports received from ceding companies.

Management believes that the liability for unpaid losses and loss adjustment expenses is adequate to cover ultimate unpaid losses and loss adjustment expenses incurred. However, such liability is necessarily based on estimates, and the ultimate liability may vary significantly from such estimates. In accordance with industry practice, the Company regularly reviews its estimated liability, and any adjustments are reflected in the period in which they become known. In accordance with guidelines established by the NAIC, the liability for unpaid losses at December 31, 2021 is reported net of estimated salvage and subrogation recoverable.
- (12) The Company did not modify its capitalization policy from the prior period.
- (13) The Company does not have pharmaceutical rebate receivables.
- (14) The Company does not own any electronic data processing equipment, operating system software, furniture and fixtures, leasehold improvements, or non-operating system computer software.

D. Going Concern

Management does not have any substantial doubt about the Company’s ability to continue as a going concern.

NOTES TO THE FINANCIAL STATEMENTS

2. Accounting Changes and Corrections of Errors

Accounting Pronouncements

Changes to statutory accounting are issued by the NAIC in the form of statutory statements of accounting principles (“SSAPs”). The Company considers the applicability and impact of all SSAPs. Except as noted below, the SSAPs adopted by the Company during 2021 did not have a material impact on the Company’s financial statements.

On March 27, 2020, former President Trump signed into law the Coronavirus Aid, Relief, and Economic Security Act (“CARES Act”). Provisions of the act specifically address temporary relief from troubled debt restructurings and temporary modification of loan provisions due to the economic stress caused by shutdown of the U.S. economy. Additionally, Federal and state government agencies and prudential banking regulators have provided temporary relief measures to financial institutions to accommodate temporary loan modifications to borrowers and to insurance carriers to provide temporary relief to premiums due.

On June 15, 2020 and July 22, 2020, the NAIC adopted and amended, respectively, INT No. 20-08, *COVID-19 Premium Refunds, Limited-Time Exceptions, Rate Reductions and Policyholder Dividends* in response to the economic effects of the COVID-19 Pandemic. The guidance clarifies that (i) voluntary and jurisdiction-directed refunds that are not required by the policy term, are return of premiums and accounted for as an adjustment to premiums and provided a limited-time exception to allow for underwriting expense reporting for the property & casualty line of businesses which met certain requirements. The limited-time exception also includes additional disclosure requirements; (ii) refunds in accordance with insurance policy terms should continue to follow existing guidance in SSAP 53, *Property & Casualty Contracts - Premiums*, SSAP 54R, *Individual and Group Accident and Health Contracts*, or SSAP 66, *Retrospective Rated Contracts*; (iii) offering rate reductions instead of premium refunds shall be recognized as immediate adjustments to premiums if it is on in force business or reflected in the premium rate charged on future renewals; (iv) disclosures and reporting of policyholder dividends on property and casualty contracts are not impacted by this interpretation but this interpretation provides additional guidance when dividends are issued in response to COVID-19 decreases in activity; and (v) disclosures on refunds, rate reductions and policyholder dividends because of decreased activity due to COVID-19 are disclosed, in addition to any other existing disclosures relating to policyholder payments. This guidance was nullified on January 1, 2021. The Company has complied with all required accounting and disclosure requirements.

In March 2021, the NAIC adopted revisions to SSAP No. 26R, *Bonds* to expand the called bond disclosures to also include bonds terminated early through a tender offer. The Company has provided all required disclosures.

* Following the April 7, 2021 sale of Metropolitan Property and Casualty Insurance Company and certain wholly-owned subsidiaries (“MPC”), the Company’s Federal income tax return is not consolidated with MPC.

- (2) The consolidating companies join with MetLife and its includable subsidiaries in filing a consolidated U.S. life and non-life Federal income tax return in accordance with the provisions of the IRC. Current taxes (and the benefits of tax attributes such as losses) are allocated to MetLife and its subsidiaries under the consolidated tax return regulations and a tax sharing agreement. Under the consolidated tax return regulations, MetLife has elected the “percentage method” (and 100% under such method) of reimbursing companies for tax attributes, e.g., net operating losses. As a result, 100% of tax attributes are reimbursed by MetLife to the extent that consolidated Federal income tax of the consolidated Federal tax return group is reduced in a year by tax attributes. On an annual basis, each of the profitable subsidiaries pays to MetLife the Federal income tax which it would have paid based upon that year’s taxable income. If MetLife or the subsidiary has current or prior deductions and credits which reduce the consolidated tax liability of the consolidated Federal tax return group, the deductions and credits are characterized as realized (or realizable) by MetLife and its subsidiaries when those tax attributes are realized (or realizable) by the consolidated Federal tax return group, even if MetLife or the subsidiary would not have realized the attributes on a stand-alone basis under a “wait and see” method.

G. As of December 31, 2021, the Company had no liability for unrecognized tax benefits.

As of December 31, 2021, the Company had no liability for Repatriation Transition Tax.

Assets and Liabilities

The methods and significant assumptions used to estimate the fair value of all admitted financial instruments are presented below.

The Company defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. In most cases, the exit price and the transaction (or entry) price will be the same at initial recognition.

When developing estimated fair values, the Company considers two broad valuation techniques: (i) the market approach and (ii) the income approach. The Company determines the most appropriate valuation technique to use, given what is being measured and the availability of sufficient inputs, giving priority to observable inputs.

The Company categorizes its financial assets and liabilities into a three-level hierarchy, based on the significant input with the lowest level in their valuation. The input levels are as follows. Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities. The Company defines active markets based on average trading volume for common stock. The size of the bid/ask spread is used as an indicator of market activity for bonds. Level 2 - Quoted prices in markets that are not active or inputs that are observable either directly or indirectly. These inputs can include quoted prices for similar but not identical assets or liabilities other than quoted prices in Level 1, quoted prices in markets that are not active, or other significant inputs that are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities. Level 3 - Unobservable inputs that are supported by little or no market activity and are significant to the determination of estimated fair value of the assets and liabilities. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions that market participants would use in pricing the asset or liability.

In general, investments classified within Level 3 use many of the same valuation techniques and inputs as described in the Level 2 discussions below. However, if key inputs are unobservable, or if the investments are less liquid and there is very limited trading activity, the investments are generally classified as Level 3. The use of independent non-binding broker quotations to value investments generally indicates there is a lack of liquidity or the general lack of transparency in the process to develop the valuation estimates generally causing these investments to be classified in Level 3.

Bonds, Cash, Cash Equivalents and Short-term Investments

When available, the estimated fair value for bonds, including loan-backed securities, cash equivalents and short-term investments, are based on quoted prices in active markets that are readily and regularly obtainable. Generally, these investments are classified in Level 1, are the most liquid of the Company's securities holdings and valuation of these securities does not involve management's judgment.

When quoted prices in active markets are not available, the determination of estimated fair value is based on market standard valuation methodologies, giving priority to observable inputs. The significant inputs to the market standard valuation methodologies for certain types of securities with reasonable levels of price transparency are inputs that are observable in the market or can be derived principally from or corroborated by observable market data. Generally, these investments are classified in Level 2.

When observable inputs are not available, the market standard valuation methodologies rely on inputs that are significant to the estimated fair value that are not observable in the market or cannot be derived principally from or corroborated by observable market data. These unobservable inputs can be based in large part on management's judgment or estimation, and cannot be supported by reference to market activity. Even though these inputs are unobservable, management believes they are consistent with what other market participants would use when pricing such securities and are considered appropriate given the circumstances. Generally, these investments are classified in Level 3.

The use of different methodologies, assumptions and inputs may have a material effect on the estimated fair values of the Company's securities holdings.

The estimated fair value for cash approximates carrying value and is classified as Level 1 given the nature of cash.

NOTES TO THE FINANCIAL STATEMENTS

Investment Income Due and Accrued

Due to the short-term nature of investment income due and accrued, the Company believes there is minimal risk of material changes in interest rates or the credit of the issuer such that estimated fair value approximates carrying value. These amounts are generally classified as Level 2.
