Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Motor Club Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the state of Rhode Island Department of Business Regulation - Insurance Division. B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC Statutory Accounting Practices and Procedures (NAIC SAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Net investment income earned consists primarily of interest and dividends less related expenses. Interest is recognized on an accrual basis and dividends are recognized on an ex-dividend basis. Net realized capital gains (losses) are recognized on a specific identification basis when securities are sold, redeemed, or otherwise disposed. Realized capital losses include write-downs for impairments considered to be other than temporary.

In addition, the Company uses the following accounting policies:

- (1) Short-investments designated highest quality and high quality (NAIC designations 1 and 2, respectively) are stated at amortized cost using the modified scientific method. All other investments not backed by other loans (NAIC designations 3 to 6) are reported at the lower of amortized cost or fair value.
- (2) Bonds not backed by other loans designated highest quality and high quality (NAIC designations 1 and 2, respectively) are stated at amortized cost using the modified scientific method. All other bonds not backed by other loans (NAIC designations 3 to 6) are reported at the lower of amortized cost or fair value.
- (3) Common stocks, other than the investment in subsidiary, are reported at values published by the NAIC, which are generally based on market values. Changes in the values of these securities are reflected directly as unrealized gains or losses, net of deferred income taxes, in statutory surplus.
- (4) The Company has no investments in preferred stocks.
- (5) The Company has no investments in mortgage loans.

 - (5) All loan-backed and structured securities in an unrealized loss position were reviewed to determine whether OTTI should be recognized. The Company asserts that it has the intent and ability to hold these securities long enough to allow the cost basis of these securities to be recovered. These conclusions are supported by a detailed analysis of the underlying credit and cash flows of each security. Unrealized losses are primarily attributable to credit spread widening and increased liquidity discounts. It is possible that the Company could recognize OTTI impairments in the future on some of the securities if future events, new information or the passage of time cause it to conclude that declines in value are other-than temporary.

(4) When quoted prices in active markets for identical assets are available, these quoted market prices are used to determine the fair value of financial assets and these assets are classified as Level 1, primarily common stocks and U.S. Treasuries. In other cases where a quoted market price for identical assets in an active market is either not available or not observable, fair value is estimated using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets would be classified as Level 2. If quoted market prices are not available, fair value is determined by using broker quotes or an internal analysis of each investment's financial statements and cash flow projections. In these instances, financial assets will be classified based upon the lowest level of input that is significant to the valuation.
