NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

Organization and Operations

Molina Healthcare of Rhode Island, Inc. (the Plan) was incorporated under the laws of the state of Rhode Island on September 17, 2021 and received its certificate of authority on May 10, 2022. The Plan is a wholly owned subsidiary of Molina Healthcare of Rhode Island Holding Company, Inc. (MRIHC), whose ultimate parent is Molina Healthcare, Inc. (MHI), a multi-state managed care organization that arranges for the delivery of healthcare services to persons eligible for Medicaid, Medicare, the state insurance marketplaces (the Marketplace), and other government-sponsored health care programs for low-income families and individuals.

A. Accounting Practices

The financial statements of the Plan are presented on the basis of accounting practices prescribed or permitted by the Rhode Island Insurance Division (the Division).

The Division recognizes only statutory accounting practices prescribed or permitted by the state of Rhode Island for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Rhode Island insurance law. The National Association of Insurance Commissioners' Accounting Practices and Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Rhode Island.

Such prescribed accounting practices have no significant effect on the Plan's statutory basis financial statements for the periods presented.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 20 Fair Value Measurements

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

Level 1 – Certain inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 – Certain inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. If the asset or liability has a specific (contractual) term, a Level 2 input must be observable for substantially the full term of the asset or liability. Level 2 inputs include the following:

- Quoted prices for similar assets in active markets;
- Quoted prices for identical or similar assets in nonactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.);
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.);
- Inputs that are derived principally from or corroborated by other observable market data.

Level 3 – Certain inputs are unobservable inputs for the asset or liability. Unobservable inputs shall be used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date.

Bonds and short-term investments are based on quoted market prices, where available.
