(3) Policy on Transfers In and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an investment to be transferred in or out of Level 3.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Bonds carried at fair value categorized as Level 2 were valued using a market approach. These valuations were determined to be Level 2 valuations as quoted markets prices for similar instruments in an active market were utilized. This was accomplished by the use of matrix pricing. Matrix pricing takes quoted prices of bonds with similar features that are inputs into the analysis included duration, credit quality, tax status and call and sinking fund features.

Common stocks carried at fair value categorized as Level 2 were valued using a market approach. These valuations were determined to be Level 2 valuations because quoted markets prices for identical instruments trading in an inactive market were utilized. When an equity instrument is illiquid due to limited trading activity, the use of quoted markets prices for identical instruments was determined by the Company to be the most reliable method to determine fair value.

Bonds and/or Common stocks carried at fair value categorized as Level 3 were valued using unobservable inputs. These unobservable inputs reflect our own assumptions about the criteria that market participants would use in pricing these assets (including assumptions about risk). These assumptions were based on the best information available in the circumstances.
