NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Practices and Going Concern

The descriptions appearing below in this Note provide an update of those discussed in "Note 1: Summary of Significant Accounting Practices and Going Concern" in the Company's Annual Statement for the for the year ended December 31, 2022, and should be read in conjunction with the complete descriptions provided in the 2022 Annual Statement.

A. Accounting Practices

The accompanying financial statements of Providence Washington Insurance Company (the "Company" or "PWIC") have been prepared on the basis of accounting practices prescribed or permitted by the Rhode Island Department of Business Regulation ("RIDBR"). RIDBR recognizes statutory accounting practices prescribed or permitted by the State of Rhode Island, which requires that insurance companies domiciled in the State of Rhode Island prepare their statutory basis financial statements in accordance with the National Association of Insurance Commissioners ("NAIC") Accounting Practices and Procedures manual ("NAIC SAP").

PWIC does not have any currently applicable prescribed and permitted accounting practices that differ from NAIC SAP.

A reconciliation of the Company's net income and surplus between practices prescribed and permitted by RIDBR and NAIC SAP is shown below:

NET INCOME	SSAP #	F/S Page	F/S Line #	<u>September 30, 2023</u>	<u>December 31, 2022</u>

6. State Prescribed Practices that increase (decrease) NAIC SAP				—	—
7. State Permitted Practices that increase (decrease) NAIC SAP				—	—
8. NAIC SAP (5-6-7 = 8)	XXX	XXX	XXX	<u>\$ 12,956,498</u>	<u>\$ 12,884,739</u>

C. Accounting Policies

2. Investments in long-term bond investments with an NAIC designation of 1 or 2 that are not backed by loans are reported at amortized cost; amortized cost is computed via the effective interest method. For bonds purchased at a price below par value, discounts are accreted over the remaining term of the bond. For bonds purchased at a price above par value, which have call features, premiums are amortized to the call date that produces the lowest yield. For bonds purchased at a premium that do not have call features, such premiums are amortized over the remaining term of the bond. Bonds with a NAIC designation of 1 or 2 are generally rated investment grade by a nationally recognized statistical rating organization.

Investments in long term bonds that have an NAIC designation of 3 to 6 that are not backed by loans are reported at the lower of amortized cost (as described above) or fair value as determined by using independent market sources, when available, and appropriate valuation methodologies when market quotes were not available. In cases where specific market quotes are unavailable, interpreting market data and estimating market values require considerable judgment by management. Accordingly, the estimates presented are not necessarily indicative of the amount PWIC could realize in the market.

The Company has a formal review process to evaluate whether impairments in the fair value of securities in its investment portfolio are "other-than-temporary". This assessment is based upon various factors, including: (i) actual or expected principal and interest payment defaults on these securities; (ii) analysis of the creditworthiness of the issuer and (iii) for debt securities that are non-highly rated beneficial interests in securitized financial assets, analysis of whether there was an adverse change in projected cash flows. If the Company believes the decline is "other-than-temporary", the Company will write-down the carrying value of the investment to the present value of the cash flows expected to be received and record a realized loss in the Statement of Income. In addition, if management either: (i) has the intent to sell its bond investment or (ii) determines that the Company more likely than not will be required to sell the bond investment before its anticipated recovery of the amortized cost basis less any current period credit impairment, then the Company will write-down the carrying value of the investment to fair value and an other-than-temporary impairment charge is recorded as a realized loss in the Statement of Income. PWIC's assessment of a decline in value includes management's current judgment of the factors noted above. If that judgment changes in the future, PWIC may ultimately record a loss after having originally concluded that the decline in value was temporary.

6. The Company did not hold investments in Residential mortgage-backed securities ("RMBS"), loan-backed and structured securities, including beneficial interests in securitizations (collectively "loan-backed securities") at or during the nine months ended September 30, 2023.

20. Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

1. The fair value of Company's financial assets and liabilities has been classified, for disclosure purposes, based on a hierarchy defined by the Statement of Statutory Accounting Principles No. 100R "Fair Value Measurements" ("SSAP 100R"). SSAP 100R specifies a fair value hierarchy based on whether the inputs to valuation techniques used to measure fair value are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect Company-based assumptions. In accordance with SSAP 100R, the fair value hierarchy has three broad levels as follows:

- Level 1 – Quoted prices for identical instruments in active markets. Assets classified as Level 1 include U.S. treasury securities and money market funds.
- Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets. Assets classified as Level 2 generally include fixed maturity securities representing municipal and corporate obligations.
- Level 3 – Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. This hierarchy requires the use of observable market data when available. Assets and liabilities classified as Level 3 would include fixed maturity securities for which quoted prices are not available and valuation models that require significant Company based assumptions.

Determination of Fair Value:

When available, the Company uses quoted market prices specific to the financial instrument to determine fair value, and classifies such items within Level 1. The determination of fair value for financial instruments categorized in Level 2 or 3 involves judgment due to the complexity of factors contributing to the valuation. Third-party sources from which we obtain independent market quotes also use assumptions, judgments and estimates in determining financial instrument values and different third parties may use different methodologies or provide different prices for securities. As a result of these factors, the actual trade value of a financial instrument in the market, or exit value of a financial instrument position by the Company, may be significantly different from its recorded fair value.

- A. The following table sets forth PWIC's financial assets and liabilities that were measured and reported at fair value in the statement of financial position after initial recognition as of September 30, 2023 by level within the fair value hierarchy.
