RHODE ISLAND AUTOMOBILE INSURANCE PLAN
Notes to Financial Statements
March 31, 2024

Note 1 – Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices, Impact of NAIC/State Differences

The accompanying financial statements have been prepared in accordance with accounting practices prescribed or permitted by the State of Rhode Island and Providence Plantations Department of Business Regulation - Insurance Division (Division). The State of Rhode Island requires insurance companies domiciled in the state to prepare their statutory financial statement in accordance with the National Association of Insurance Commissioner' (NAIC) Accounting Practices and Procedures Manual.

The Rhode Island Automobile Insurance Plan's (referred to as the Plan) primary responsibility is to provide automobile insurance to qualified applicants unable to procure such insurance through ordinary methods. Plan was granted a Certificate of Authority in October 2018 and started writing private passenger automobile insurance on January 1, 2019. Prior to this, the Plan used a Service Center approach to handle the residual market policies and assigned them to various insurance companies that write within the state. The residual market is funded by the creation of a pooling mechanism and, through assessments, is funded by all member insurers in the state.

The Board of Governors has appointed AIPSO to act as Central Processor to perform accounting and statistical functions for the Plan for which it is charged a service fee. Assessments are remitted to AIPSO as Central Processor when due. Every insurer authorized to write automobile liability or physical damage insurance in the state shall be a member of the Plan and shall subscribe to and be bound by the rules and regulations adopted pursuant thereto. AIP members will record the assessments on their books as boards and bureaus expense. Each member company will report to AIPSO as Central Processor any credits or exception premium that would be netted with NAIC annual statement premium as required by the state Plan of Operation.

AIPSO maintains separate general ledger records to account for the AIP business. They have a chart of accounts, ledgers, and necessary support to clearly control the policy and claim services reported. The Plan maintains detail records for the private passenger policies written after January 1, 2019.

Differences between Rhode Island prescribed practices and NAIC statutory accounting practices (NAIC SAP) follow:

B. Use of Estimates

No change

C. Accounting Policies

No change

D. Going Concern

Based upon its evaluation of relevant conditions and events, management does not have substantial doubt about the Plan's ability to continue as a going concern.

A-I The Plan is a tax exempt- organization as described in Section 501(c)(6) of the Internal Revenue Code (the Code) and is generally exempt from income taxes pursuant to Section 501(a) of the Code. Based on the structure of the Plan described in note 1, if the Plan was determined to be a taxable entity, there would be no impact to the financial statements, as the Plan is operating in a net loss position and a full valuation allowance would be recorded. The Plan is required to assess certain and uncertain tax positions and has determined that there were no uncertain positions that are material to the financial statements.

Note 20 – Fair Value Measurements

A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

The use of different assumptions or valuation methodologies may have a material impact on the estimated fair value amounts. The valuation techniques are based on observable and unobservable pricing inputs.

Observable inputs reflect market data obtained from Plan's independent sources based on trades of securities, while unobservable inputs reflect market assumptions. These inputs comprise the following fair value hierarchy:

Level 1 – Observable inputs in the form of quoted prices for identical instruments in active markets.

Level 2 – Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active or other inputs that are observable or can be derived from observable market data for substantially the full term of the assets or liabilities.

Level 3 – One or more unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets and liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using internal models, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The level in the fair value hierarchy within which a fair measurement in its entirety falls is based on the lowest level input that is significant to the fair value measurement in its entirety.

The carrying amount of cash and cash equivalents are level 2 prices as they approximate fair value.
