The accompanying financial statements of Neighborhood Health Plan of Rhode Island (the “Company” or “Neighborhood”) have been prepared in conformity with accounting practices prescribed or permitted by the state of Rhode Island for determining and reporting the financial conditions and results of operations of an insurance company for determining its solvency under Rhode Island Insurance law. B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Health capitation premiums are recognized in the period members are entitled to related health care services. Health care service costs and the related liabilities for claims payable are recorded when medical services are authorized, as well as when services are provided without authorization to the extent such services are expected to be ultimately authorized. Expenses are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds are stated at amortized cost using the scientific interest method. The Company does not have any mandatory convertible securities and SVO-identified investments.
- (3) The Company had no common stock.
- (4) The Company had no preferred stock.
- (5) The Company had no mortgage loans.
- (6) The Company only had loan-backed securities designated with NAIC 1 and 2 designations and are reported at amortized cost.
- (7) The Company had no investments in parent, subsidiary or affiliates.
- (8) The Company had no investments in joint ventures, partnership, and limited liability companies based on the underlying GAAP equity of the investee.
- (9) The Company had no derivatives.
- (10) The Company does utilize anticipated investment income as a factor in the premium deficiency calculation.
- (11) Unpaid losses and loss adjustment expenses include amounts determined from claims estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability, are continually reviewed and any adjustments are reflected in the period determined.
- (12) The Company’s capitalization policy has not changed.
- (13) The Company’s pharmaceutical rebate receivables are estimated based on a historical percentage of gross pharmaceutical claims methodology.
