1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying financial statements of The Beacon Mutual Insurance Company (the "Company") have been prepared in conformity with insurance accounting practices prescribed or permitted by the Rhode Island Insurance Department. The State of Rhode Island requires insurance companies domiciled in the State of Rhode Island to prepare their statutory financial statements in accordance with the National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual.

SSAP 97 requires investments in subsidiaries to be carried at the entity's underlying audited statutory equity. As the Castle Hill Insurance subsidiary ("Castle Hill") has been inactive since its inception, the State of Rhode Island has granted the subsidiary an exemption from filing audited financial statements. As such, the State of Rhode Island has also granted a permitted practice to allow Castle Hill to be recorded on the Company's balance sheet as an invested asset at its unaudited statutory equity value.

A summary of the impact of the permitted practice on the Company's net income and surplus as a result of recording Castle Hill as an invested asset is estimated to be as follows:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, along with the reported amounts of revenues and expenses during the reporting period. Significant items subject to such estimates and assumptions include the Company's loss and loss adjustment expense reserves which have a significant effect on Incurred Losses and Loss Adjustment Expenses and related Net Income. Actual results could differ from these estimates.

C. Accounting Policies

Premiums are earned over the terms of the related policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance assumed. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as agent commissions, are charged to operations as incurred.

Real estate investments are classified in the balance sheet as properties occupied by the Company and carried at depreciated cost less encumbrances, if any. The fair values reported in Schedule A-Part 1 were obtained from an external independent appraisal company with values as of November 25, 2024.

In addition, the Company uses the following accounting policies:

1. Short-term investments and Cash Equivalents are stated at amortized value.

2. Bonds not backed by other loans, with an NAIC designation of 1 or 2, are stated at amortized value using the interest method. Bonds not backed by other loans, with an NAIC designation of 3 through 6, are stated at the lower of amortized cost or fair value using the interest method.
3. Common stocks, other than investments in stocks of subsidiaries, are stated at fair value.
4. Perpetual preferred stocks are stated at fair value, not to exceed any currently effective call price. Redeemable preferred stocks with a designation of 1 or 2 continue to be stated at cost. Our investment managers have not yet updated their accounting system; however, the impact is immaterial at this time. Redeemable preferred stocks with an NAIC designation of 3 through 6 are stated at the lower of cost or fair value.
5. The Company does not own mortgage loans.
6. Asset-backed securities are stated at either amortized cost or the lower of amortized cost or fair value using the interest method, including anticipated prepayments at the time of purchase. Prepayment assumptions are generated using a third-party prepayment model, and on an ongoing basis, the rate of prepayment is monitored, and the model calibrated to reflect actual experience, market factors, and viewpoint. Asset-backed securities are revalued periodically based upon the new prepayment assumptions, if needed. The retrospective adjustment method is used to revalue all securities except for interest only securities, securities where the yield has become negative or securities where an "other than temporary impairment" was recognized, which are valued using the prospective method.
7. The Company values its investments in subsidiaries as follows: GAAP basis for BMIC Service Corporation and the Statutory Equity Method for Castle Hill Insurance Company as described in part Five, Sections 8biii and 8bi, respectively, of the NAIC Purposes and Procedures Manual of the Securities Valuation Office.
8. The Company has minor ownership interests in joint ventures and partnerships which are carried at fair market value.
9. The Company does not invest in derivatives.
10. The Company anticipates investment income as a factor in the premium deficiency calculation in accordance with SSAP No. 53 - Property-Casualty Contract Premiums and was not required to record a premium deficiency reserve as of December 31, 2025.
11. The Company provides reserves for unpaid insurance losses and loss adjustment expenses which cover events that occurred in the current and prior years. These reserves reflect estimates of the total cost of claims reported but not yet paid, and the cost of claims not yet reported, as well as the estimated expenses necessary to settle the claims. Reserve estimates are based on past loss experience modified for current claim trends as well as prevailing social, economic and legal conditions. Final claim payments may ultimately differ from the established reserves, particularly when these payments may not occur for several years. Reserve estimates are continually reviewed and updated and any resulting adjustments are reflected in current operating results.

Reserves are reduced for amounts to be recovered through reinsurance agreements but are not discounted or reduced for estimated subrogation recoveries. Subrogation recoveries are recorded when received.
12. The Company has a written capitalization policy for the purchase of items such as land, buildings and improvements, leasehold improvements, furniture and equipment, leased property, software, electronic data processing equipment, vehicles and other equipment. No change has taken place during the year.
13. The Company has no pharmaceutical rebate receivables.

1. Less than 12 Months	6,754,088
2. 12 Months or Longer	<u>43,039,109</u>

5. All asset-backed and structured securities in an unrealized loss position were reviewed to determine whether an other-than-temporary impairment should be recognized. For those securities in an unrealized loss position as of December 31, 2025, the Company has not made a decision to sell any such securities. The Company evaluated its cash flow requirements and believes that its liquidity is adequate and it will not be required to sell these securities before recovery of their cost basis. As of December 31, 2025, the Company can attest that it has the intent and believes that it has the ability to hold these securities long enough to allow the cost basis of these securities to be recovered. The conclusions are determined by a detailed analysis of the underlying credit and cash flows on each security. It is possible that the Company could recognize other than temporary impairments in the future on some of the securities held at December 31, 2025 if future events, information, and the passage of time causes it to conclude that declines in value are other than temporary.

Income before federal taxes differs from taxable income principally due to the dividends-received deduction, differences between loss and loss adjustment expense and unearned premium reserves for tax and financial reporting purposes, the exemption of certain investment income from federal income taxes and the other than temporary impairment of investments.

The provision for federal income tax consists of the following components:

	2025	2024
1 Current Tax		
a Federal	267,452	-
b Foreign	-	-
c Subtotal	267,452	-
d Federal income tax on net capital gains	390,061	-
e Utilization of cap loss c/f	-	-
f PY True Ups	-	-
Federal and foreign income taxes incurred	657,513	-

The statutory basis of accounting requires that the Company record deferred tax assets and liabilities for certain temporary differences between statutory basis income before federal income taxes, plus certain items recorded directly to surplus, and taxable income as reflected in the Company's federal income tax return, subject to certain limitations.

The components of the net deferred tax asset/(liability) at December 31, 2025 are as follows:

A. Inputs Used for Assets and Liabilities Measured at Fair Value

1. Fair Value Measurements by Levels 1, 2 and 3

The Company has categorized its assets and liabilities that are measured at fair value into the three-level fair value hierarchy as reflected in the table below. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows:

Level 1 – Values are unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

Level 2 – Inputs include quoted prices for similar assets or liabilities in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are observable or can be corroborated by market data for the term of the instrument. Such inputs include market interest rates and volatilities, prepayment speeds, spreads and yield curves.

Level 3 – Certain inputs are unobservable (supported by little or no market activity) and significant to the fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants would use to determine a transaction price for the asset or liability at the reporting date.

The following tables provide information as of December 31, 2025, and 2024 about the Company's financial assets and liabilities measured at fair value.

	December 31, 2025			Net Asset

At the end of each reporting period, the Company evaluates whether or not any event has occurred, or circumstances have changed that would cause an instrument to be transferred between Levels 1 and 2. This policy also applies to transfers into or out of Level 3 as stated in paragraph 3 below.

During 2025, the Company had no transfers into or out of Level 3.

2. Rollforward of Level 3 Items

The Company has no material assets or liabilities measured at fair value in the Level 3 category.

3. Policy on Transfers Into and Out of Level 3

At the end of each reporting period, the Company evaluates whether or not any event has occurred or circumstances have changed that would cause an instrument to be transferred into or out of Level 3. During the current year, no transfers into or out of Level 3 were required.

4. Inputs and Techniques Used for Level 2 and Level 3 Fair Values

The Company has no assets or liabilities measured at fair value in the Level 3 category.

The Company's investments in bond and debt securities and preferred stock reported at fair value are classified in Level 2. Fair values of the investments reported in this category are provided by independent pricing services. Where independent pricing services provide fair values, the Company has obtained an understanding of the methods, models and inputs used in pricing and has controls in place to validate that the amounts provided represent current fair values.

Typical inputs to models used by independent pricing services include but are not limited to benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, reference data, and industry and economic events. Because some preferred and common stocks do not trade daily, independent pricing services regularly derive fair values using recent trades of securities with similar features. When recent trades are not available, pricing models are used to estimate the fair value of securities by discounting future cash flows at estimated market interest rates.

5. The Company has no derivative assets or liabilities.

B. Combination of Fair Value Information
