NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Practices and Going Concern

A. Accounting Practices

The accompanying financial statements of Providence Washington Insurance Company (the "Company" or "PWIC") have been prepared on the basis of accounting practices prescribed or permitted by the Rhode Island Department of Business Regulation ("RIDBR"). RIDBR recognizes statutory accounting practices prescribed or permitted by the State of Rhode Island, which requires that insurance companies domiciled in the State of Rhode Island prepare their statutory basis financial statements in accordance with the National Association of Insurance Commissioners ("NAIC") Accounting Practices and Procedures manual ("NAIC SAP").

PWIC does not have any currently applicable prescribed and permitted accounting practices that differ from NAIC SAP.

A reconciliation of the Company's net income and surplus between practices prescribed and permitted by RIDBR and NAIC SAP is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with statutory accounting practices prescribed or permitted by the State of Rhode Island requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and disclosures. There can be no assurance that actual results will conform to such estimates and any future changes in estimates could be material to the financial statements.

C. Accounting Policies

Direct, assumed and ceded premiums written on insurance policies are earned on a daily pro-rata basis over the terms of the covered risk. Unearned premiums represent the portion of premiums written that relate to unexpired risk. The costs of acquiring insurance premiums, including sales commissions and premium taxes, if any, are charged to current operations as incurred. Ceding fees in excess of the acquisition costs are established as a liability (deferred ceding fees) and recognized on a pro-rata basis over the life of the underlying policies and are included as a contra-expense in other underwriting expenses incurred in the statement of income.

Expenses are charged to operations as incurred.

Pursuant to the tax sharing agreement, the Company is included in Octave Specialty Group, Inc.'s (formerly known as Ambac Financial Group, Inc.) ("OSG") consolidated federal income tax return. Amounts assessed / reimbursed are based on separate return calculations made as if PWIC had filed its own federal income tax return for each taxable period. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The change in deferred tax assets and liabilities is charged directly to unassigned surplus. The realization of the deferred tax asset is dependent upon the Company's ability to generate sufficient taxable income in future periods.

In addition, the Company utilizes the following accounting policies:

- Short-term investments are stated at amortized cost, which approximates fair value. Money market mutual funds as identified by the SVO are reported in cash equivalents at fair value.
- Investments in long-term bond investments with an NAIC designation of 1 or 2 that are not backed by loans are reported at amortized cost; amortized cost is computed via the effective interest method. For bonds purchased at a price below par value, discounts are accreted over the remaining term of the bond. For bonds purchased at a price above par value, which have call features, premiums are amortized to the call date that produces the lowest yield. For bonds purchased at a premium that do not have call features, such premiums are amortized over the remaining term of the bond. Bonds with a NAIC designation of 1 or 2 are generally rated investment grade by a nationally recognized statistical rating organization.

Investments in long term bonds that have an NAIC designation of 3 to 6 that are not backed by loans are reported at the lower of amortized cost (as described above) or fair value as determined by using independent market sources, when available, and appropriate valuation methodologies when market quotes were not available. In cases where specific market quotes are unavailable, interpreting market data and estimating market values require considerable judgment by management. Accordingly, the estimates presented are not necessarily indicative of the amount PWIC could realize in the market.

The Company has a formal review process to evaluate whether impairments in the fair value of securities in its investment portfolio are "other-than-temporary". This assessment is based upon various factors, including: (i) actual or expected principal and interest payment defaults on these securities; (ii) analysis of the creditworthiness of the issuer and (iii) for debt securities that are non-highly

NOTES TO FINANCIAL STATEMENTS

rated beneficial interests in securitized financial assets, analysis of whether there was an adverse change in projected cash flows. If the Company believes the decline is “other-than-temporary”, the Company will write-down the carrying value of the investment to the present value of the cash flows expected to be received and record a realized loss in the Statement of Income. In addition, if management either: (i) has the intent to sell its bond investment or (ii) determines that the Company more likely than not will be required to sell the bond investment before its anticipated recovery of the amortized cost basis less any current period credit impairment, then the Company will write-down the carrying value of the investment to fair value and an other-than-temporary impairment charge is recorded as a realized loss in the Statement of Income. PWIC’s assessment of a decline in value includes management’s current judgment of the factors noted above. If that judgment changes in the future, PWIC may ultimately record a loss after having originally concluded that the decline in value was temporary.

The Company did not hold any mandatory convertible securities at December 31, 2025.

3. The Company did not hold investments in unaffiliated common stocks at December 31, 2025.
4. The Company did not hold investments in preferred stocks at December 31, 2025.
5. The Company did not hold investments in mortgage loans at December 31, 2025.
6. The Company did not hold investments in Residential mortgage-backed securities ("RMBS"), loan-backed and structured securities, including beneficial interests in securitizations (collectively "loan-backed securities") at or during the year ended December 31, 2025.
7. The Company did not hold investments in subsidiaries, controlled or affiliated companies at December 31, 2025.
8. The Company did not hold investment in joint ventures, limited liability companies or partnerships at December 31, 2025.
9. The Company did not hold derivative instruments at December 31, 2025.
10. The Company anticipates investment income as a factor in the premium deficiency calculation, in accordance with SSAP No. 53 - Property Casualty Contracts - Premiums.
11. Loss and loss expense reserves represent management's estimate of the ultimate liability for unpaid losses and loss expenses for claims that have been reported and claims that have been incurred but not yet reported ("IBNR") as of the balance sheet date. The reserves are estimated based upon experience and using a variety of actuarial methods. These estimates are continually reviewed and are subject to the impact of future changes in factors such as claim severity and frequency, underwriting and claims practices, changes in social and economic conditions including the impact of inflation, legal and judicial developments, medical cost trends and upward trends in damage awards. The ultimate amount for loss and loss expenses may be in excess, or less than, the amounts recorded on our financial statements. Adjustments will be reflected as part of the net increase or reduction in loss and loss expense reserves in the periods in which they become known.

Management of the Company believes that the reserves for losses and loss adjustment expenses are adequate to cover the ultimate cost of claims arising from insured policies, but the reserves are based on estimates and there can be no assurance that the ultimate amount for loss and loss expenses may be in excess, or less than, the amounts recorded on our financial statements.

12. The Company has a capitalization policy for prepaid expenses and purchases of items such as electronic data processing equipment, software, furniture, other equipment and leasehold improvements.
13. The method of estimating pharmaceutical rebate receivables is not applicable as the Company does not write major medical insurance with prescription drug coverage.

D. Going Concern

Not Applicable.

2. Accounting Changes and Corrections of Errors

A. Accounting Changes Other than Codification and Correction of Errors

In August 2023, the NAIC issued revisions to SSAP No. 26R, Bonds, which went into effect on January 1, 2025. These revisions update the principles-based bond definition, the accounting for bonds (issuer credit obligations and asset-backed securities) and include revisions to several SSAPs in which this updated definition is reflected. Investments that do not qualify as bonds under the new guidance shall be reclassified to Other Invested Assets and reported in accordance with the applicable SSAP. Based on the Company’s current investment portfolio and assessment of the revised guidance, the Company did not reclassify any bonds to Other Invested Assets. The Company has reflected the new disclosure requirements related to the updated bond definition and related investment classifications in the 2025 annual statutory financial statements.

3. Business Combinations and Goodwill

20. Fair Value Measurements
- A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value
 - 1. The fair value of Company's financial assets and liabilities has been classified, for disclosure purposes, based on a hierarchy defined by the Statement of Statutory Accounting Principles No. 100R "Fair Value Measurements" ("SSAP 100R"). SSAP 100R specifies a fair value hierarchy based on whether the inputs to valuation techniques used to measure fair value are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect Company-based assumptions. In accordance with SSAP 100R, the fair value hierarchy prioritizes model inputs into three broad levels as follows:
 - Level 1 – Quoted prices for identical instruments in active markets. Assets classified as Level 1 include U.S. treasury securities and money market funds.
 - Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets. Assets classified as Level 2 generally include fixed maturity securities.
 - Level 3 – Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. This hierarchy requires the use of observable market data when available.

Determination of Fair Value:

When available, the Company uses quoted market prices specific to the financial instrument to determine fair value, and classifies such items within Level 1. The determination of fair value for financial instruments categorized in Level 2 or 3 involves judgment due to the complexity of factors contributing to the valuation. Third-party sources from which we obtain independent market quotes also use assumptions, judgments and estimates in determining financial instrument values and different third parties may use different methodologies or provide different prices for securities. As a result of these factors, the actual trade value of a financial instrument in the market, or exit value of a financial instrument position by the Company, may be significantly different from its recorded fair value.
