NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of Providence Washington Insurance Company are presented on the basis of accounting practices prescribed or permitted by the Rhode Island Insurance Department.

The Rhode Island Insurance Department recognizes only statutory accounting practices prescribed or permitted by the state of Rhode Island for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under Rhode Island Insurance Law. The National Association of Insurance Commissioners' (NAIC) *Accounting Practices and Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Rhode Island. The Rhode Island Insurance Department has the right to permit specific practices that deviate from prescribed practices.

Reconciliations of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the state of Rhode Island for the twelve months ending December 31, 2014 and 2013 are shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies and reinsurance contracts. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business and are based on reports received from ceding companies for reinsurance.

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Expenses incurred are reduced for ceding allowances received or receivable.

Short-term investments are stated at amortized cost.

Bonds not backed by other loans are stated at amortized cost using the interest method. Non-investment grade bonds are stated at the lower of amortized value or fair value.

Common stocks at market except that investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 20% or more are carried on the equity basis.

Redeemable preferred stocks are stated at amortized value. Perpetual preferred stocks are stated at fair value. Non-investment grade preferred stocks are stated at the lower of amortized value or fair value.

Loan-backed bonds and structured securities are stated at either amortized cost or the lower of amortized cost or fair market value. The constant yield scientific method including anticipated prepayment assumptions is used to value all securities. Changes in current prepayment assumptions are accounted for using the prospective method.

The Company anticipates investment income as a factor in the premium deficiency calculation.

NOTES TO FINANCIAL STATEMENTS

Loss and loss adjustment expense reserves are estimates that provide for the ultimate expected cost of settling unpaid losses and claims reported at each balance sheet date. Losses and claims incurred but not reported, as well as expenses required to settle losses and claims, are established on the basis of various criteria, including historical cost experience and anticipated costs of servicing reinsured and other risks. Considerable judgment is required to evaluate claims and establish estimated claim liabilities, particularly with respect to certain lines of business, such as reinsurance assumed, or certain types of claims, such as environmental and asbestos liabilities. The environmental and asbestos exposures do not lend themselves to traditional methods of loss development determination and, therefore, reserve estimates related to these exposures may be considerably less reliable than for other lines of business. The Company believes that overall reserving practices have been consistently applied, and that its aggregate net reserves have resulted in reasonable approximations of the ultimate net costs of claims incurred. These estimates are continually reviewed and adjusted as necessary; such adjustments are reflected in current operations. The Company's liability for unpaid loss and loss adjustment expense is presented net of amounts recoverable from reinsurers.

The Company is a member of an affiliated group of companies which file a consolidated federal income tax return. Under the terms of an intercompany tax allocation agreement, the Company is allocated federal income taxes by applying the current regular federal tax rate to statutory results of operations modified by book versus tax adjustments. Alternative minimum taxes are allocated ratably to companies with taxable income.

Realized capital gains and losses on the sale of investments are determined on a specific identification method and are included in the determination of net income. Unrealized capital gains and losses resulting from changes in the valuation of investments at fair value are credited or charged directly to surplus.

The Company regularly evaluates investments based on current economic conditions, credit risk experience and other circumstances of the underlying securities. A decline in a security's net market value that is not a temporary fluctuation is recognized as a realized loss, and the cost basis of that security is reduced.

Premiums earned, loss and loss adjustment expenses incurred, unearned premiums, and the liability for losses and loss adjustment expenses are reflected net of reinsurance assumed from and ceded to other companies.

Land, building and equipment are carried at cost less accumulated depreciation and are reflected net of encumbrances. Depreciation is calculated on a straight-line basis over the allowable estimated useful lives of the assets.

The assets and liabilities of operations with foreign functional currencies are translated net into U.S. dollars at current exchange rates and the resulting adjustment recorded is reflected as a liability in the statutory financial statements. The resulting net translation adjustments for each period are included in surplus.

D. Loan-Backed Securities

- (1) Our asset manager uses a proprietary model for loss assumptions and widely accepted models for prepayment assumptions in valuing mortgage-backed and asset-backed securities with inputs from major third party data providers. It combines the effects of interest rates, volatility, and prepayment speeds based on Monte Carlo simulation with credit loss analysis and resulting effective analytics (spreads, duration, convexity) and cash-flows are reported to clients on a monthly basis. Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.

Pricing Level 1 - Valuations based on unadjusted quoted prices in active markets for identical assets that pricing sources have the ability to access. Pricing Level 2 - Valuations based upon quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets; or valuations based on models where the significant inputs are observable (e.g. interest rates, yield curves, prepayment speeds, default rates, loss severities) or can be corroborated by observable market data.

Pricing Level 3 - Valuations that are derived from techniques in which one or more of the significant inputs are unobservable, including broker quotes which are nonbinding.

Note 25- Change in Incurred Losses and Loss Adjustment Expenses

For 2014, the Company has recorded prior year savings totaling \$3.3 million. The Company entered self-administered runoff in May 2004. Due to the uncertainties associated with runoff, the Company previously adopted a prudent and conservative practice of recording loss and loss adjustment expense reserves over and above the Appointed Actuary's central estimate. During the ensuing years subsequent to runoff, the loss and loss adjustment expense reserves have behaved in a generally predictable manner and developed favorably. The Company began recording its loss and loss adjustment expense reserves to the Appointed Actuary's central estimate commencing with year-end 2008. That practice remains in effect for 2014. The only line of business experiencing material development was Workers' Compensation (\$1.1 million). Lines of business with savings were Commercial Multi-Peril (\$0.4 million) and Non-proportional Assumed Liability (\$0.4 million).

The largest contributor to the \$3.3 million of incurred loss and loss adjustment expense savings was the decrease in the Adjusting and Other reserves of \$5.8 million. This provision was decreased in order to conform to the Appointed Actuary's estimate for Adjusting and Other as of December 31, 2013 plus to conform with the 2014 evaluation of Adjusting and Other reserves.

The Company does not have any retrospectively rated policies and accordingly no adjustments were made to premiums.

The Company's liabilities for unpaid workers' compensation claims are discounted. All discounting is done using a rate of 3.5%, as required by the State of Rhode Island.

In total, the December 31, 2014 and December 31, 2013 liabilities include \$1,766,000 and \$1,944,000 of indemnity discount, respectively. NOTES TO FINANCIAL STATEMENTS

Note 33- Asbestos/Environmental Reserves

The Company has exposure to environmental and asbestos claims. All such exposures from all affiliates are pooled together and then allocated back to the separate companies based on their participation percentages in the pooling arrangement. The Company's environmental and asbestos exposure arises from the Group's past sale of General Liability, Commercial Multi-Peril, and Commercial Automobile insurance as well as from past participation in Assumed Reinsurance Pools. Regarding the direct exposure, the Group estimates the full impact of the environmental and asbestos exposure by establishing full case-basis reserves on all known claims and by computing incurred but not reported losses based on historical experience.

As respects the environmental and asbestos liability arising from assumed reinsurance, the Group was a participant in a pool of approximately fifty assumed reinsurance treaties which were discontinued in 1987. One of these treaties involves a small share of the ECRA pool. The participation in each treaty, although small (ranging from one-half of one percent to four percent), varied substantially by year with not all treaties being in-force for all years.

A. Does the company have on the books, or has it ever written an insured for which you have identified a potential for the existence of a liability due to asbestos losses? Yes

The Company tries to estimate the full impact of the asbestos exposure by establishing full case basis reserves on all known losses and computing incurred but not reported losses based on previous experience.
