(1) Prepayments assumptions for Mortgage-Backed Securities, Collateralized Mortgage Obligations and Other Structured Securities were generated using a purchased prepayment model. The prepayment model uses a number of factors to estimate prepayment activity including the time of year (seasonality), current levels or interest rates (refinancing incentive), economic activity (including housing turnover) and term and age of the underlying collateral (burnout, seasoning).

(5) All impaired securities (fair value is less than cost or amortized cost) have been evaluated by management, based on specific criteria to determine if the impairments should be considered other than temporary. Factors considered in determining that other than temporary impairment charges are warranted include: management's consideration of current and near term liquidity needs and retrospective review of length of loss over credit quality of investment and general market conditions. Management has concluded that the value of the investments for which it reports unrealized losses at June 30, 2017 are not other than temporarily impaired, as management has the intent and ability to hold these securities for a period of time sufficient to allow for any anticipated recovery in market value.
